01 PROFILE

I'm a freelance full stack website developer covering all aspects of Marketing, Website Development, System Development, SEO & More.

I've been a PHP developer for 8 years focusing on large scale systems such as billing, crm, status monitoring, cdns, analytics and have grown to provide a fully responsive stylish website design to be used for these.

I'm always looking for new projects and to date am yet to find a challenge hard enough to where I couldn't complete it.

02 EMPLOYMENT HISTORY

Apr 2018 – Present

Corby, Northamptonshire

Lead Developer at PsittacusSystems

Management of the development team and developing projects based around e-learning, jobs, streaming and general system development. As Lead Developer I manage all systems, new development projects and maintenance across all our machines owned hardware within a local data centre.

Jan 2016 – Present

Corby, Northamptonshire

Managing Director at LiamSystems LTD

Within the LiamSystems LTD there are a number of companies including XenoPanel and Xyve that are projects developed by myself and marketed, supported and sold by a team I've built up over the years. Projects are up-kept however are left to run on their own with my team in place allowing them to earn a living while I enjoy making random projects.

Jun 2017 – Feb 2018

Leamington Spa

Full Stack Developer at HaB International

Developed Bespoke systems such as tickets, emailing, chats, microsites and also developed e-commerce sites around the Magento 1.9 framework.

Feb 2017 – Mar 2017

Remote

PHP Developer at StreamLabs

StreamLabs is a wide known Donation platform in the online gaming world. I was approached by StreamLabs to work with them to develop tool to scrape and map out data from other platforms such as Youtube, Twitter and Twitch to allow them to gauge what market share they had. StreamLabs actually found me after I made a project called TwitchCode, a version of what they offer.

Jan 2014 – Jan 2015

IT Support at Castle Care Homes Limited

CastleCare homes IT supports over 50 homes around the UK with IT troubles such as printers, computers, virus checks etc and it was my role to be on the phone along with remote access to ensure the homes had the issues resolved.
