## Work experience

---

### XenoPanel LIMITED

2016-2018

Lead Developer

XenoPanel is a custom control panel based around game servers, voice servers and systems such as ticket system, billing system, chat systems and more designed for standard use or company use. I developed these features with a custom framework in PHP that also communicated with remote machines using both ssh and custom daemons.

Technologies used include PHP and Mysql., HTML, CSS, Javascript, JQuery,

## HaB International LTD 2017-2018

### Lead Website Developer

As part of the marketing team it was my role to complete a backlog of bugs, exploits and requests around 5 websites while developing new systems and platforms on magento, magento2 and custom bespoke systems. Along with these day to day tasks I managed migrating all websites, databases and more into new hardware and maintained these.

Technologies used include PHP and Mysql., Magento1.9.

## Travitor 2016 — Sept 2016

June

### Freelance Developer

In charge of developing a whole new control panel for Travitor, a learning management software, I worked remotely from their main office in Vegas and once the project was completed sadly parted ways as they wanted me to move there in order to work full-time, however at the time I felt it wasn't a good way for me to move forward at the age of only 19 at the time.

Technologies used include PHP and Mysql., HTML, CSS, Javascript, JQuery,

## Freelance Developer Liam Systems

2015 — 2017

I worked on both internal systems and client facing applications, Within around two years I founded and developed some large platforms still being used to this day such as InfinitePlaylist (Youtube API Music Platform), XenoPanel (Huge Game Control Panel) and have also owned hosting companies providing dedicated machines to clients around the world.

Most the details, examples or links about these projects can be found at my personal website. @  
<http://liam.systems>

Technologies used include PHP and Mysql., HTML, CSS, Javascript, JQuery,

## CastleCare IT Support

2014 — 2015

I handled IT support from over 50 houses across the UK.

My primary role at CastleCare has been to support internal customers and IT equipment. I asked the user relevant questions in order to identify the source of the problem.

## Qualifications

---

GCSEs:

Mathematics C & D  
ICT OCR Level 2 National Award Merit  
ICT OCR Level 2 National First Award Merit  
Triple Science D

Other Training & Qualifications:

Edexcel Function Skills Qualification  
Manual Handling Training  
Health & Safety Training  
Fire Awareness Training  
First Aid Training

## Interests

---

I've always had a passion for developing websites and that's something I've done since the age of 13 (Currently 21). I have always loved the idea of being a developer for a company instead of being a freelancer or owning a website because you get the chance to work with some amazing developers and learn things you might not have known before.

Most of my time is spent by developing freelance but I hope to slow down or stop that when it comes to getting a job for a company. In the weekends I enjoy going paintball with my team or family along with go-carting, snowboarding or football.
