PROFILE

I'm a full stack developer covering all aspects of Website Development, System Development, Graphics Design, SEO & more.

I've been a PHP developer for over 10 years focusing on large scale systems such as billing, crm, status monitoring, cdns, analytics, ai, server monitoring, website deployment, asset management and have grown to provide a fully responsive stylish website design to merge both front-end design and backend-logic.

High standard of SOLID Principles, Code Optimization and Agile Development in PHP, NodeJS & JavaScript.

My full portfolio can be found at <https://liam.systems>

EMPLOYMENT HISTORY

Lead Software Engineer, Psittacus Systems

Corby,
Northamptonshire

Apr 2018 — Sep 2022

Management of development teams and developing projects based around e-learning, jobs, streaming and general system development. As Lead Software Engineer, I managed all systems, new development projects and maintenance across all our machines owned hardware within a local data center.

During my time with Psittacus and it's sub-companies I developed and managed development for a wide variety of projects shown below;

Systems developed included a bespoke learning platform, billing platforms, sales platforms, live chat, ticket system, spam ai, face ai, discord bots, server managers, and monitoring platforms.

PHP, Laravel, HTML, CSS, Javascript, JQuery, NodeJS, Python, MySQL, MongoDB, Redis, InfluxDB, AWS, Docker, VPS Managers, Grafana, Github, AI [Python/PHP], CDN, GDN, APIs, Sockets, PM2, Ploi & Trello.

Technical Lead, Servacus

Rothwell,
Northamptonshire

Apr 2021 — Present

Servacus is a hosting provider with company owned Data Centers within Northamptonshire UK. Servacus provides server colocation,

HOBBIES

Movies, Snowboarding,
Go-Karting, Paintball, Coding,
Pub Nights, Slight-Gaming

LINKS

[Portfolio](#)

dedicated servers, vps, web hosting and more to customers all over the world.

Servacus has custom monitoring for all forms of data including connectivity traffic, ddos attacks, power usage and more. Servacus has fully bespoke platforms to manage all clients and offer powerful tools such as Website Traffic Monitoring, Server Monitoring, DDoS Attack Protection and more.

PHP, Laravel, Slim, InfluxDB, Grafana, HTML, CSS, Javascript, JQuery, NodeJS, MySQL, MongoDB, Github & Redis.

Freelancer, LiamSystems

Rothwell,
Northamptonshire

Jan 2016 — Present

Within LiamSystems Freelance there are a number of projects including XenoPanel (Custom Game Server Managing Platform) and Xyve (Custom Dedicated Server Automated Builders) that are projects developed by myself and marketed, supported and sold by a team I had built up over the years. Projects were up-kept however are left to run on their own with my team in place allowing them to earn a living while I enjoy making random projects.

Other projects include Dating platform, Music Streaming platform, Twitch Streaming platform, Billing platform, Website Designer & more.

PHP, Laravel, HTML, CSS, Javascript, JQuery, NodeJS, Python, MySQL, MongoDB, Redis, AWS, Docker, VPS Managers, Github, CDN, GDN, APIs & Sockets.

Full Stack Developer, HaB International

Leamington Spa

Jun 2017 — Feb 2018

HaB developed breathing training tools for climbers and people working at highest or needed high breathing tolerances.

I developed bespoke systems such as tickets, emailing, chats, microsites and also developed e-commerce sites around the Magento 1.9 framework.

PHP, Laravel, Magento, WordPress & HTML.

PHP Developer, StreamLabs

Remote

Feb 2017 — Mar 2017

StreamLabs is a wide known Donation platform in the online gaming world. I was approached by StreamLabs to work with them to develop tool to scrape and map out data from other platforms such as Youtube, Twitter and Twitch to allow them to gauge what market share they had. StreamLabs actually found me after I made a project called TwitchCore, a version of what they offer.

PHP, Laravel, Sockets, Youtube API, Twitch API

IT Support, Castle Care Homes Limited

Jan 2014 — Jan 2015

CastleCare homes IT supports over 50 homes around the UK with IT troubles such as printers, computers, virus checks etc and it was my role

to be on the phone along with remote access to ensure the homes had the issues resolved.
